

TREATMENT FOLLOW UP INSTRUCTIONS

Congratulations! You're on your way to becoming completely lice free

We want to make our 4-step treatment process as successful and thorough as possible. Please follow these instructions to eliminate the possibility of re-infestation. By following these simple steps you'll find yourself on the way to eliminating your household completely of head lice 100% guaranteed! For best results, use these instructions after the first application of the treatment enzyme.

- 1. The person, who had been treated, is considered clean of lice and must be protected from being re-infested with anything or anybody in the house that may carry lice. To avoid cross contamination all siblings and parents should be checked.**
- 2. Immediately vacuum the carpet, sofas and upholstered chairs. Focus on the backs and cracks of the seats. Do not use toxic lice sprays from the store to treat furniture. They are ineffective and can rub off on people and animals and are not necessary.**
- 3. Pull any and all hair out of brushes before putting them in a container of hot steaming water. Let them soak along with combs and any other grooming tools for 20 minutes. You can also use the dishwasher if it is more convenient.**
- 4. Immediately wash all the clothes and bedding that the affected person was wearing in the past 48 hours. Wash in HOT water and machine dry using the HOT cycle for at least 20 minutes. If you do not wish to subject the clothes or other used items to high heat, isolate and let them sit for 48 hours and then wash as usual.**
- 5. Think about ANYTHING that comes in contact with your loved ones head and that can have live lice (headphones, hats, hair ties, stuffed animals, coats, or a car seat). The items that cannot be washed or vacuumed need to be isolated or visually inspected for live lice or eggs. Just remember, lice cannot survive without a host after 24-48 hours so if in doubt let it sit. Lice need to feed every 4 hours, if they miss 4 consecutive feedings they'll die.**
- 6. Make sure you attend your next scheduled treatment in 3-5 days if you are receiving the OC's Hair Police guarantee, or follow-up on your own at home. Follow up treatment is imperative for a successful louse arrest. If application of treatment is not performed, you will have another infestation in less than 2 weeks!**
- 7. Continue to check for eggs or lice, once a week for 3 weeks. If you find ANY live lice, call us immediately. It could be a re-infestation and needs to be treated.**

**If you still have any questions, Call O.C.'s Hair Police any time day or night at
949.631.2675 • lousearrest@hairpolicelicense.com**
